质生活的象征。超越对于物质的过度依赖，清理内心的繁杂和浮躁之后，关注世界，关注环境，关注人群，关注内心，这是所有绿脚丫成员的期盼。

Green Foot is an International Environment Care Community who believes that environmental protection is an attitude towards and a way of living. In Green Foot, environmental protection refers to minimalism and quality life. The joint wish of all the members in Green Foot is that we overcome our over dependency on materials, clean up our inner space, save more time and energy to concern about the world, the environment, the surrounding, the people and our own hearts.

当我们的社会正在被AI迅速去劳动化，便捷的生活让我们不再需要花更多时间在日常生活，我们更多的被局限于手机里的令人眼花缭乱的资讯里。我们的躯体越来越静止，生命正在变得虚拟化。那些实实在在的生命，大自然里的生物都将越来越远离我们。

When our society is rapidly being de-labored by artificial intelligence, and the convenient life means that we no longer need to spend more time in daily life, we are more enveloped in the dazzling variety of information on our mobile phones. Our bodies are becoming more and more silent, and life is becoming virtual. Those real lives and creatures in the world will become farther and farther away from us.

AI 作图

然而有一群人，他们希望人在被AI解放劳动之后，更多的能关注实实在在的物质存在的世界。一草一木，生命互相交织和激励。当你看着一片新叶，一个新的花苞，那种对生命的期盼，感受那份能量的流动，这远不是虚拟世界能带给我们的实实在在的感受。如果有一天我们能居住在大自然里，如果我们的房子可以有生命，我们只是大自然的一部分？

However, there is a group of people who hope that after people are liberated from labor by AI, they can pay more attention to the real world of physical existence. Every plant and every tree, life is intertwined and inspiring. When you look at a new leaf, a new bud, that kind of expectation for life, and feel the flow of energy, this is far from the real feeling that the virtual world can bring us. What if one day we could live in nature, what if our houses could be alive and we were just part of nature?

Speech Topic: Building with living trees  
演讲主题：用活树建造

With photos from his travels, Felix will show us how to grow houses and bridges out of living trees.

In this talk, Felix shows us how to grow houses out of living trees. He will share photos from his studies of living structures in Asia and Europe.

A good example is the Shusheng bridge in Foshan as above photo shows.

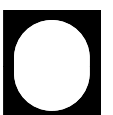

菲利克斯将通过他旅行中的照片向我们展示如何用活树建造房屋和桥梁。

在这次演讲中，菲利克斯向我们展示了如何用活树建造房屋。他将分享他对亚洲和欧洲生命结构的研究照片。

佛山的树圣桥就是一个很好的例子，如上图所示。

With an academic background in architecture and physics, Felix regularly gives workshops and organizes the setup of experimental structures.

His goal is to inspire the next generation to study about nature, to advance engineering, and to experience construction at architectural scale.

In contrast to traditional construction, we don't destroy the environment. We regenerate the environment!

菲利克斯拥有建筑和物理学的学术背景，他定期举办研讨会并组织实验结构的设置。

他的目标是激励下一代研究自然、推进工程并体验建筑规模的建造。

与传统建筑相比，我们不会破坏环境。我们再生环境！

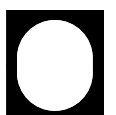

此次活动还将以分组讨论的形式，让大家一起深入探讨活着的建筑话题。这是一个知识交流和灵感碰撞的独特时刻。

This event will also use group discussions to allow everyone to discuss the topic of desert environmental protection in depth. This is a unique moment of knowledge exchange and inspiration.

除了环保话题，这也是一个社交的盛会，一个与来自各行各业的人们交流的机会。每个人都能建立新的链接，结交志同道合的朋友，共同致力于保护我们宝贵的自然资源。

In addition to environmental protection topics, this is also a networking event, an opportunity to communicate with people from all walks of life. Everyone can create new connections and make like-minded friends who work together to protect our precious natural resources.
